DEAN SEARLEY OF SPRINGFIELD COLLEGE ADDRESSES FRESHMEN

Delivers Interesting Talk on "The Mind" in Physical Education Period

The Freshmen were very fortunate to have, at their weekly Physical Education lecture, as a speaker, Dean Searley of Springfield College.

Dr. Searley, who was presented by "Pete" Bigler, spoke fully three quarters of an hour on a subject which is near to all of us at Tech and more especially to those first year men who are beginning the great training that this college has to offer. Dr. Searley has been connected with Springfield College for several years and, as a member of the football team of '92, he made a touchdown against Harvard.

"The Mind" was Dr. Searley's subject and it was treated in such a pleasing manner that it is to be regretted that the entire student body could not have been present.

According to Dr. Searley, the mind is the controlling force of the body. No action is put into effect until the signal has passed muster in the mind center and gone back to be put into power by the muscle or muscles needed to do the action.

Dr. Searley cited many examples of fellows he had helped out of difficulties during his career and endeavored to point out that impressions made during early childhood were all important. An impression once pictured on the mind will remain there until concentrated effort and new associations replace it. Even then the dim outlines of the first picture remain and will be ready to work unless effort is made to overcome its action.

The ever present problem of "Sex" was approached in a manner that made it exceedingly clear and was of value to all concerned.

We sincerely hope that Dr. Searley will favor us again with his presence and look forward to that day with interest.

CONCERT WILL BE PRESENTED

Tech-Clark Glee Clubs Will Combine in Final Concert

Every year Clark and Tech compete in basketball, soccer and baseball, and every year the rivalry seems to become more intense. Sometimes Clark wins and sometimes Tech comes out on top, but always both teams give of their best to win. This spirit of rivalry is reflected in our attitude toward each other, but now comes the one time of the year when Clark and Tech get together with a feeling of good fellowship and enjoy together an entertainment by their combined activity.

This event is the Clark-Tech Glee Club concert which is put on by the combined clubs of the two schools. This year the concert is to be held at the Bancroft Hotel in the main ballroom from eight until twelve o'clock, Friday evening, May 22. Every year, this is one of the best entertainments

(Continued on Page 2, Col. 3)

DR. BROUGHER GIVES LAST FULLER LECTURE OF YEAR

Delivers Humorous and Energetic Address on "Keys and Keyholes" — Band Shows Marked Improvement

Last Thursday the student body met in the Gymnasium for the last of the 1931 series of Fuller Lectures. Some fear that the speaker was lost in the maze of Worcester traffic was evidenced at eleven o'clock, but the exercises opened with the speaker present at 11.03.

The Tech Band, led by Mr. Fitzgerald, played for the opening and Ralph Hodgkinson presided over the gathering. A few student announcements were made and the Glee Club rendered "Keep in the Middle of the Road" as a sort of pre-view of the coming Tech-Clark concert.

President Earle, in a few well-chosen words, introduced the speaker of the day, the Rev. J. Whitcomb Brougher.

Dr. Brougher is a newcomer to the East, having been in Boston about a year. He went there from the Pacific coast where he has made his home for the past thirty-five years. The moment that he mounted on the stand the audience knew that a pleasant three-quarters of an hour lay ahead for the speaker's face showed a vivid personality.

"The subject of my talk," said Mr. Brougher, is 'Keys and Keyholes,' and as I go on you may see no connection between my talk and my subject, but anyway, that's the subject." However, the subject did have a direct bearing on the subject matter.

The essence of the talk was that without a place to put the key to success, namely, the keyhole, the key itself is rather useless. In comparing that to the Institute he demonstrated that we are here gathering material that we hope to go out into the world and put into use for mankind. We have the material, the key to success, but unless we use it to advantage, there can be no success.

There are three planes of life: physical, mental, moral and spiritual; and there are as many and more kinds of people. To live in one of these planes is not enough, and no success can come unless one makes an earnest endeavor to develop all three of these factors. Build up a strong body to carry your soul around, develop your mental powers to their capacity, live a clean life in the fear of God and you are a man with success yours for the asking.

Be an optimist, store up all the bright things that life has to offer. Dr. Brougher used an amusing though adequate picture of an optimist as compared with a pessimist, saying that a pessimist is like a man with large hips who wears a belt and suspenders and then carries a safety pin around with him, while an optimist is like a man with practically no hips who wears neither belt nor suspenders. Speaking of anecdotes, Dr. Brougher gave many, and each one added zest to the talk and illustrated a point to great advantage.

(Continued on Page 2, Col. 4)

MAJ. EDWARDS, '83, TAKEN BY DEATH

Was Famous Inventor of Steel Plant Apparatus

Major Victor C. Edwards, Tech, '83, and famous inventor, died at his home in West Boylston last week after a long illness. He was formerly vice president of the Morgan Construction Co., a director of the Mass. Mutual Life Insurance Co., and a trustee of Worcester Tech. He graduated from Tech in 1883 with a B.S. degree, later receiving the doctor of engineering degree.

Major Edwards received more than 100 United States and foreign patents on his steel manufacturing inventions, but his invention of the flying shears was what made him famous as they made possible, for the first time, the continuous process of steel manufacture in the rolling mills. Before his shears were introduced, it was necessary to stop the rolling process in order to cut the rods. His invention, however, made it possible to eliminate this waste of human and mechanical power by running his shears along with the steel and cutting without stopping the progress.

CAMERA CLUB TO HOLD MEETING

Mr. Carter, Specialist in Night Photography, Will Speak

The last meeting this year of the W. P. I. Camera Club will be held Friday evening at 7.30 o'clock in Mechanical Engineering departmental library. Mr. William B. Carter, who is now connected with the State Mutual Insurance Co., has been secured by Prof. Charles J. Adams, the faculty advisor of the club, to tell of his experiences in photography and especially concerning the taking of night photos.

Mr. Carter is a member of the Worcester Photo Club of which Professor Adams is also a member, and was a member of the old Worcester Camera Club which has been succeeded by the Photo Club. He is probably the only enthusiast of photography in Worcester who specializes in night photography and is quite a master of the art judging from his collection of photographs of that type. Two of his best prints are winter night views of the Worcester City Hall and the Masonic Temple. Both of these prints will be among the collection to be exhibited before the club Friday. Mr. Carter has been an exhibitor at many salons both in the United States and Europe. He is also an expert in the use of platinum instead of silver in developing photographs.

As this is the final meeting of the school year as well as one that promises to be most interesting, all members and those interested should attend.

ADDITIONS MADE TO FACULTY

Three Graduates of Institute Become Instructors

Because of his recent illness, Mr. Edwin H. Whitney, '71, is unable to give the lectures he had planned to give on the 14th, 21st and 28th of this month, but will be able to give the last two which come on the 12th and 13th of June. The lecture schedule for the 28th of May will be given by Harry Swenberg of the Norton Co.

Mr. Whitney was taken ill with lobar pneumonia in April and has been slowly convalescing since.

All three meetings will be held in the Electrical Engineering building, in the lecture room, at 3.30 p. m. on the dates specified above. Prof. F. J. Adams will have charge of the first one; Prof. A. S. Richey, the second, and Prof. J. O. Phelon, the final one. The Junior Marshals will be the ushers.

With the close of the school year rapidly drawing near, new instructors for the next college year have been appointed, the announcement of which has been recently released. Three scholars who reside in Worcester have been appointed: Almon Francis Townsend, Jr., a member of this year's Senior class, Warren Richard Purcell, Class of 1930, and Arthur Mott Tarbox, a member of the Class of 1928.

Townsend will be an instructor in Mechanical Engineering. He is the permanent vice president of the Class of 1931, president of the Skull society, a member of Tau Beta Pi and a letterman in track. Along with these, he took active part in the following: manager of football, Knights of the Road, class president in last half of Soph year, Banquet Committee, Junior Prom Committee and Junior Marshall.

Both Purcell and Tarbox, since their graduation, have been employed by the Westinghouse Electric & Manufacturing Co. and have been doing test work at the Institute in the Electrical Engineering laboratory under the supervision of Dr. Harold B. Smith.

Purcell was the winner of the essay prize at the commencement exercises last year. He was a member of the Newman Club, Banjo Club, Orchestra, Rope-pull, Carnival Skit, Junior Prom Committee, Commencement Committee and A. I. E. E.

Tarbox is a member of Tau Beta Pi, Sigma Xi and Theta Chi. His activities at the school were: Track, Class Track, Rope-pull Coxswain, Band, Treasurer of A. I. E. E. and also Chairman, Vice President of Y. M. C. A. and Tech Banquet Committee.

SPORTSMANSHIP

There's a breathless hush in the Close tonight—
Ten to make and the match to win—
A bumping pitch and a blinding light,
An hour to play and the last man in.
And it's not for the sake of a ribboned coat,
Or the selfish hope of a season's fame,
But his Captain's hand on his shoulder smote
"Play up! play up! and play the game!"

The sand of the desert is sodden red,—
Red with the wreck of a square that broke;—
The gatling's jammed and the Colonel dead,
And the regiment blind with dust and smoke.
The river of death has brimmed his banks,
And England's far, and Honour a name,
But the voice of a schoolboy rallies the ranks:
"Play up! play up! and play the game!"

This is the word that year by year,
While in her place the School is set,
Every one of her sons must hear,
And none that hears it dare forget.
This, they all with a joyful mind
Bear through life like a torch in flame,
And falling fling to the host behind—
"Play up! play up! and play the game!"

To play the game like gentlemen has always been our goal. The mere victory or defeat has been but a means to the end and not the end in itself. What more could we ask than to emerge from the fray with a true sportsman's smile, whether it be in victory or in defeat? We have tried to cast aside the old adage, "To the victor belongs the spoils," merely to replace it with a better slogan, "All the world loves a true sportsman." When can the qualities of a gentleman be better brought out, than by taking defeat with a smile upon his face and a word of congratulation to the victor?

In the most recent issue of the Clark News, the undergraduate weekly of Clark University, there appeared an editorial roundly condemning the actions of the four or five Tech men who "lifted" the Clark flagstaff before the very eyes of the student body of that college, while the last Clark-Tech game was in progress at the Clark field. The act, intended as a practical joke, was the work of individuals and cannot be characterized as an exhibition "of the lowest type of sportsmanship" by the student body of the Worcester Polytechnic Institute. Let it not be said that Tech is not represented by true sportsmen and gentlemen. Should the act of a few remove the good qualities of many?

We assure the aggrieved parties that the theft of the pennant was as much of a surprise to the Tech student body as it was to their own. That this was not at once apparent is rather astonishing in view of the fact that the fate of the banner remained a mystery at both colleges until those in possession of it chose to announce its whereabouts to the newspapers.

It is hoped that the pennant will be returned to its rightful owners at once so that when Clark comes here next Saturday the incident will be forgotten. The student body trusts that the loss of the Clark banner will not be taken as symbolic of Tech spirit.

Let's show them how wrong their opinion of us, as expressed in the editorial, really is. We have the assurance of the Clark News that their men are going to try to outdo us in exhibiting the true traits of gentlemen; let's turn the tables on them and welcome them to our campus and beat them at their own game. They have been urged to show us that the Clark spirit is the gentlemanly spirit. Let's show them that the Tech spirit is no different.

GLEE CLUB CONCERT

(Continued from Page 1, Col. 1)
provided and this year a better one than usual is scheduled. The combined clubs present several selections and the individual clubs each have prepared a number of pieces. There will be solos, quartet presentations, and, as a climax, the combined groups have trained for a presentation of Faust, a very difficult and beautiful work, which the group does very well indeed. This is the first time that an amateur group has attempted to give such a selection.

After the entertainment there will be two hours of dancing. This entertainment is one which we should all make an effort to attend, not only to support the Musical Associations, but for our own benefit as well.

ASSEMBLY

(Continued from Page 1, Col. 5)
That no man can succeed long doing wrong is made evident every day in our newspapers. People are every day being apprehended by the authorities for doing wrong. They may be successful in their unlawful enterprises for a time but sooner or later they will make

a slip and the next thing they know they are brought to justice. If one

TECH NETSTERS DEFEAT TUFTS

Tech Tennis Team Triumphs by Wide Margin

The Tech court team took its fourth victory of the season on Wednesday by defeating Tufts with a high score of 5-1. The matches were played on the Alumni courts, and despite adverse weather conditions, the matches went off with good snap.

"Russ" Corsini took his match with a score of 6-3 and 6-2. McLarin of Tufts put up a game fight with a speedy serve and good placements, but "Russ's" activity and placements proved supreme.

"Ev" Collins took his match without much trouble. The match was fast and interesting to watch with many long volleys. Once again the Engineers proved more efficient and "Ev" closed out with scores of 6-1 and 6-4.

"Beto" Corsini took a well-rounded match of service and volleys from Walker of Tufts. The boys both had hard fast serves but with the ease of a veteran, "Beto" forged through opposition and took both sets at 6-2 and 6-0.

"B.II" Werth played the long match of the day against Howard of Tufts. The boys fought hard for every point and games were hard to take but the Engineers won and the score closed, 6-2 and 6-3. All four of the singles matches were won by Tech.

The doubles match between Corsini and Collins of Tech and Ingraham and Walker of Tufts proved the match of the day though the weather seemed to affect the play to a large extent. There was much comedy as well as luck and Walker of Tufts took the courts as the "Bounding Basque" of the day. He was alive with enthusiasm and he and his partner, Ingraham, finally took two sets out of three with scores of 8-10, 8-6 and 6-4.

Werth and Corsini took their inevitable match of doubles, winning with scores of 6-1 and 6-3 from McLarin and Howard.

The team this year is one of the strongest that Tech has ever had. Consistent winning is a true mark of ability but losses must be expected, especially against such a team as was encountered Saturday, the 9th, at Springfield. The team deserves all the support that we can offer, and a larger attendance should be on hand to witness such playing as they have to offer.

Summary:
R. Corsini, Tech, defeated McLarin, Tufts, 6-3, 6-2; E. Collins, Tech, defeated Ingraham, Tufts, 6-1, 6-4; U. Corsini, Tech, defeated Walker, Tufts, 6-2, 6-0; W. Werth, Tech, defeated Howard, Tufts, 6-2, 6-3.

Doubles, Ingraham and Walker, Tufts, defeated Corsini and Collins, Tech, 8-10, 8-6 and 6-4; U. Corsini and Werth, Tech, defeated McLarin and Howard, Tufts, 6-1, 6-3. Match totals, 5-1.

TENNIS TEAM TAKES FIFTH

Tech Wins Every Match From Conn. Aggies

The Tech tennis team made a trip to Storrs, Conn., on Friday and defeated Conn. Aggies, 6-0. The matches were easy and the Engineers took each man without much trouble. This is the team's fifth victory of the season, losing only to the powerful racket wielders of Springfield. Friday's match was not on the published schedule but as the Saturday match with Boston College was postponed, the Friday match did not weaken the schedule in any way. The next scheduled match is with Clark College on the Tech courts, Wednesday.

Summary: Singles, R. Corsini, Tech, defeated Erzastog, Conn. Aggies, 6-3, 6-2; U. Corsini, Tech, defeated Reiman, Conn. Aggies, 10-8, 6-1; Werth, Tech, defeated Wandy, Conn. Aggies, 6-2, 6-1; Wilson, Tech, defeated Skublikas, Conn. Aggies, 9-7, 6-0.

Doubles, R. Corsini and U. Corsini, Tech, defeated Erzastog and Reiman, Conn. Aggies, 6-3, 2-6, 6-1; Wilson and Werth, Tech, defeated Skublikas and Wandy, Conn. Aggies, 6-0, 6-2. Finals, 6-0.

TECH IS LOSER IN N. H. U. GAME

Noreika and Purrington Play Well in Vain

The Engineers traveled to Durham last Saturday only to lose to the University of New Hampshire with a score of 6-1. It was only errors in crucial moments of the game that gave New Hampshire its game as Russ Purrington pitched well, allowing only nine hits. His opponent, Stafford, allowed the Tech men eight hits. Johnny Noreika, Tech's left fielder, led the hitting for the day, gathering three hits out of four trips to the plate, but his teammates were unable to push him around. Shaw, understudy Bert Lanciault, entered the fray in the eighth inning and handled himself capably.

The first score of the game came in the second inning when Lisabeth was sent home on a balk by Purrington as the ball unfortunately slipped from his hand during his windup. Worcester came back in the next inning when Lanciault scored from second, on a bad throw over third base by Gibbons to catch him stealing third. New Hampshire scored two more runs in the fourth inning and three in the fifth to put the game on ice.

ASSEMBLY

(Continued from Page 2, Col. 4)
obeys the law of a force that force becomes one's servant, otherwise it becomes one's master. This is readily demonstrated by the law of gravity.

Dr. Brouger emphasized the importance of side-stepping habits. Don't be a slave to habits for when they cannot be satisfied they make one unhappy.

The talk by the Rev. J. Whitcomb Brouger came to an end all too soon. The assembly was well attended and those who were not present missed the opportunity of hearing one of the finest speakers that ever spoke to the students of Worcester Tech.

first taste of defeat May 15 when it bowed to the mighty B. U. team at the Albemarle Club in Newton with a one-sided score of 5-1. Heald was the only victorious Tech man. The Brown match, which was slated for May 16, has been postponed. On May 18 Tech meets Amherst and should even up last week's defeat.

Results of the B. U. match:

Two-somes: Knowles (BU) defeated Cheatham (W) 3 and 2; Kellogg (BU) defeated Kowalski (K) 4 and 2; Tyson

L. C. A. LEADS IN BASEBALL RACE

Weather Allows only Two Games This Week

With the end of the interfraternity baseball season rapidly approaching, Lambda Chi Alpha, last year's champions, seem destined to repeat their success. Until last week the race was between T. U. O. and L. X. A. but the real race now shapes up as a battle for second honors between T. U. O. and P. S. K. This is a very important contest as its outcome will decide who shall receive the large athletic trophy for the year, both houses being deadlocked at present.

The most important and interesting battle this week was staged Tuesday night between L. X. A. and T. U. O. Lambda Chi pushed over a run in the first inning but in their half, T. U. O. retaliated with two markers. The score was again tied in the third frame when Lambda Chi scored on an error. Another error by T. U. O. in the fifth allowed the winning run to cross the platter. Terry pitched good ball for T. U. O. but his support was ragged at times. Gleason was on the receiving end. Clark again toed the slab for Lambda Chi, pitching his usual good ball with a bit of wildness at times. He was held up by Bill Cullen. Tommy Stevens, diminutive L. X. A. shortstop, did heavy stickwork, collecting three hits in as many trips to the plate. He also scored three runs.

On account of the rainy weather prevailing, only one other game was played this week. That was on Friday, L. X. A. and Theta Chi being the participants. The game resulted in an easy 10-2 victory for the former. With Bob Hunter twirling and Bill Cullen catching, T. C. was limited to two tallies while the lads from Trowbridge road made their bats ring on the offerings of Barnes and Pollard who held the mound for Theta Chi. Brad Newell did the receiving for the latter.

A. I. E. E. MEETING

(Continued from Page 1, Col. 4)
making a large lens comes from the fact that small bubbles form in the mass, and a smooth surface is hard to obtain. Bubbles in the quartz make uneven lumps when polished. Very high temperatures are required to melt the substance and remove bubbles.

When this large reflector is complete, it is hoped that it will make possible the solution of many astronomical problems which cannot be solved at the present time because of the limits of power in the present telescopes.

Mr. Ellis is an authority on the manufacture of quartz, having worked it through all stages. He brought with him a number of samples of quartz, among which was a rod about four feet long. Through this rod he sent light from an incandescent lamp and was able to light a match from the heat evolved at the end.

Quartz has many interesting characteristics and we shall hear more about this substance in the future. The subject is fascinating and Mr. Ellis' lecture was entertaining as well as instructive. We hope to hear more from him some time soon.

(BU) defeated Backstrom (W) 1 up; Heald (W) defeated Gustafson (BU) 4 and 3.

Foursomes: Knowles and Kellogg (BU) defeated Cheatham and Kowalski (W) 6 and 4; Gustafson and Tyson (BU) defeated Heald and Backstrom (W) 1 up.

Five records fell at the Eastern Intercollegiate track meet held here Saturday as Springfield with 531.3 points nosed out Northeastern with 52. Worcester Tech placed third with a total of 191.3.

Chubbuck, the Connecticut Aggie iron man, started the record breaking by putting the shot 46 ft., 3.4 in. In the afternoon events, the records for the 120 high hurdles was broken by F. Powers of Northeastern. The other hurdle mark was shattered shortly after this by his teammate, MacKenzie. A new half-mile record was established when Brown of Springfield broke the tape 158.25 seconds after the starting gun. The previous record of 2 min., 25 sec. had been standing for nine years.

The outcome of the meet was problematical up to the very last event, the javelin throw. So close were the two leading contestants that success in the throw would have turned the tide of victory and sent the championship to Northeastern instead of Springfield. However, Footrick and Grundy managed to come through and save the day for Springfield.

A summary of the final events is as follows:

100-yard high hurdles — Won by F. Powers, Northeastern; 2nd, McLean, Middlebury; 3rd, Chubbuck, C. A. C.; 4th, E. Powers, Springfield. Time, 15.35 sec. (new record).

100-yard dash — Won by Evans, Springfield; 2nd, Falt, Northeastern; 3rd, Sullivan, W. P. I.; 4th, Amann, Springfield. Time 10.15 sec.

440-yard dash — Won by Shea, Northeastern; 2nd, Woodward, W. P. I.; 3rd, Jaeger, Springfield; 4th, Gruni, Northeastern. Time, 50.45 sec.

220-yard low hurdles — Won by MacKenzie, Northeastern; 2nd, Shaw, Springfield; 3rd, E. Powers, Springfield; 4th, Chubbuck, C. A. C. Time, 24.45 sec. (new record).

220-yard dash — Won by Evans,

plants as it makes both wooden and tubular metal structures.

The students then inspected the Pratt and Whitney Aircraft plant where motors for army and navy planes are made. It is only with special permission that an inspection trip of this plant is possible. This factory is divided into four large sections: the stockroom, the army and navy compartment, the repair department, and the assembly line.

The Aero Club, although unable to go to East Hartford, is planning a trip to the Boston airport.

An important meeting of the Club is to be held Tuesday night. Every member is urged to be present as the election of officers is to take place.

AERO CLUB IN-
SPECTS PLANTS
Members Observe Construction of Planes

Last Wednesday morning the students in the Aeronautical course left the Mechanical Engineering Building to make an inspection trip to East Hartford, Conn. This trip is a required part of the Aeronautical course. Because of the Freshman chemistry exam, the Aero Club was unable to go on the trip. On arriving in East Hartford, the group inspected the entire Chance-Vought Corporation plant. Army and navy planes are manufactured in this plant. Only half the factory is now in full operation, permitting a large increase in production in time of need. The factory is entirely under government supervision so close observation of the processes is impossible. This plant is better equipped than other

\$50,000

EMERY HERBERT YOUNG, Painted Post, N. Y.

IN congratulating the winners in the great Camel contest we want at the same time to thank most cordially the approximately million men and women who displayed their friendly interest by sending in an entry.

We wish also to thank the millions of smokers throughout the country for the appreciation they are showing for our new Humidor Pack as is evidenced by the notable increase in the sale of Camel cigarettes.

By means of this dust-proof, germ-proof,

moisture-proof Cellophane wrapping the rich aroma and full flavor of choice Turkish and mellow Domestic tobaccos have been air-sealed in Camels for your enjoyment.

If you have not tried Camels in the Humidor Pack all we ask is that you switch over to this brand for one day.

After you have learned how much milder, how much cooler, how much more enjoyable it is to smoke a perfectly conditioned fresh cigarette, go back to the harsh hotness of stale cigarettes if you can.

CAMELS

Smoke a fresh cigarette
